Additional Facility Information

Building T130B was an approximately 15,400 square foot modular trailer acquired in 1991. The structure was corrugated metal siding with corrugated metal skirting. The entrances had wooden stairs leading to a wooden enclosure.

Building T130B had the following utilities: electrical, plant water, plant sanitary and fire protection provided by an overhead sprinkler system and wall mounted fire extinguishers.

The entire T130B structure was removed during D&D activities, and sent offsite for disposal. The utilities were disconnected and removed to at least three feet below final grade as indicated on the attached map. There are no remaining structural components, utility lines, or parts of the foundation. The buildings are not in an IHSS or PAC therefore no soil sampling is required.
